

‘How to assess the LEADER added value: approaches and experiences’

2023 European LEADER Congress

19 December 2023

European Evaluation Helpdesk for the CAP

Funded by
the European Union

Why we are here?

- To inform ... how to assess LEADER added value
- To share ... good practices
- To inspire ... importance of evaluating LDS and LEADER added value

... networking!!!

What is your experience?

In groups of 5-6 people:

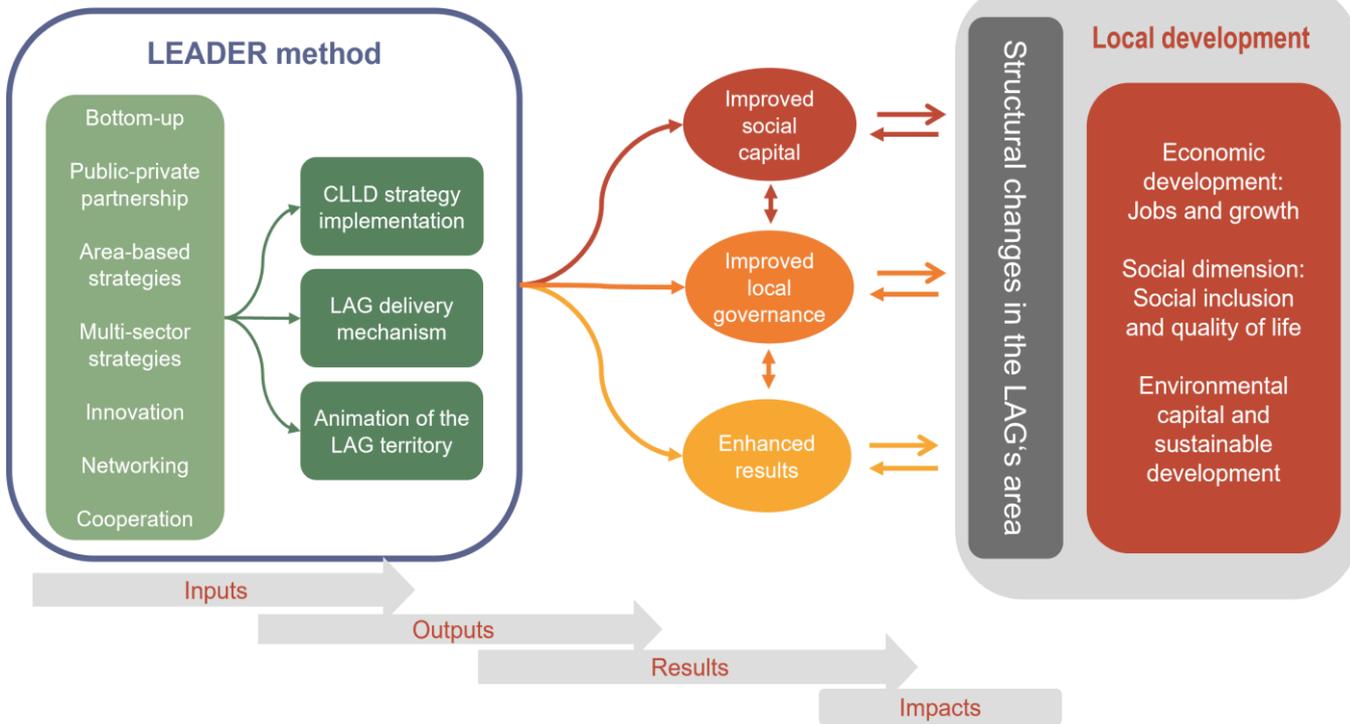

- › Introduce yourself
- › 2 positive statements / experiences
- › 2 challenges
- › At least 1 question

on **assessing**
LEADER
added value

Diving into the evaluation of the LEADER added value

Concept developed by the Evaluation Helpdesk to capture LEADER benefits (including intangible benefits)

Based on 3 elements:

- Governance (participation of rural society in designing and steering its development strategy...)
- Social capital (local networks, rural community involvement, ...)
- Better results (including additional benefits; cooperation, multi-objective projects, ...)

Guidelines

‘Assessing the added value of LEADER’

- › Operationalised concept of the LEADER added value
 - › Examples of evaluation frameworks of the LEADER added value (2023-2027)
 - › Examples of how the LEADER added value can be assessed.
-
- Guidelines are not mandatory
 - Options to choose for MS, *according to their context and evaluation needs*

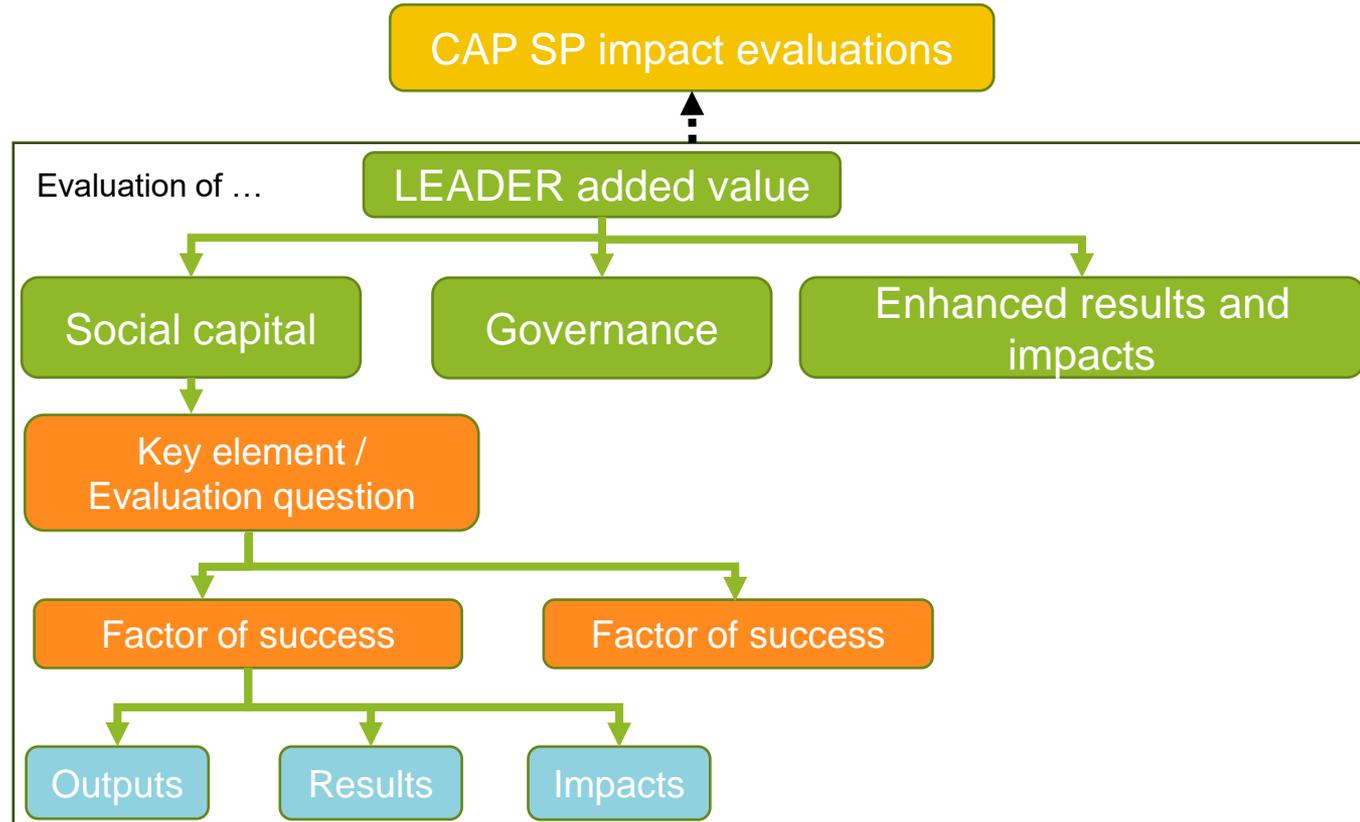

Possible evaluation framework

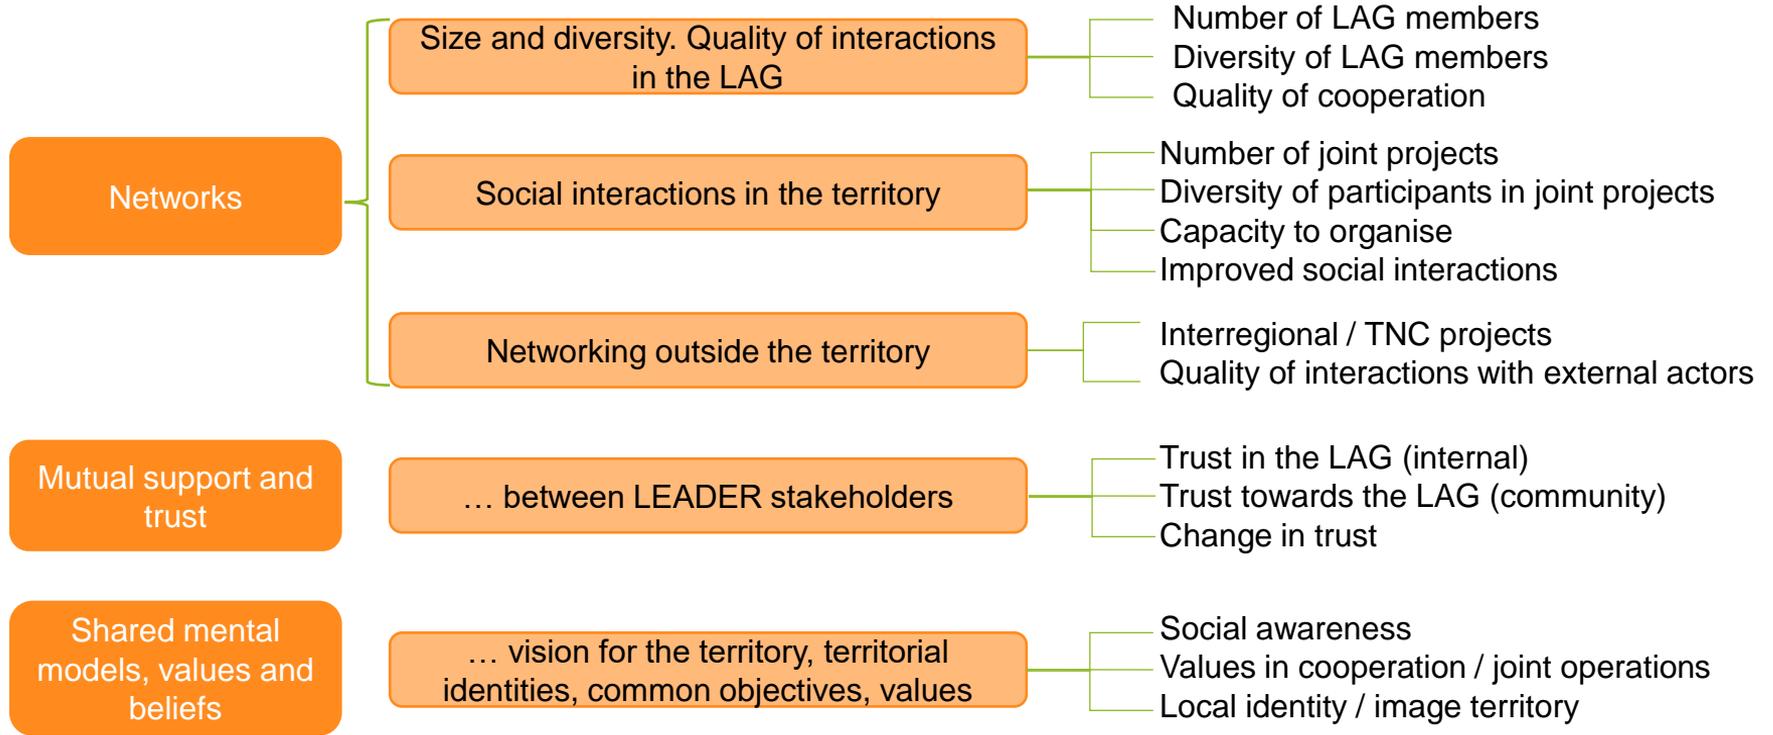

LEADER added value - evaluation topic in MS

Pertinent (context, evaluation needs) **key elements, FoS and indicators** can be applied / further adapted by MS

Improved social capital

Sources mainly the DME data
(Annex VII, Reg. (EU) No 2022/1475)

Additional data collection (surveys, focus groups)

A tool

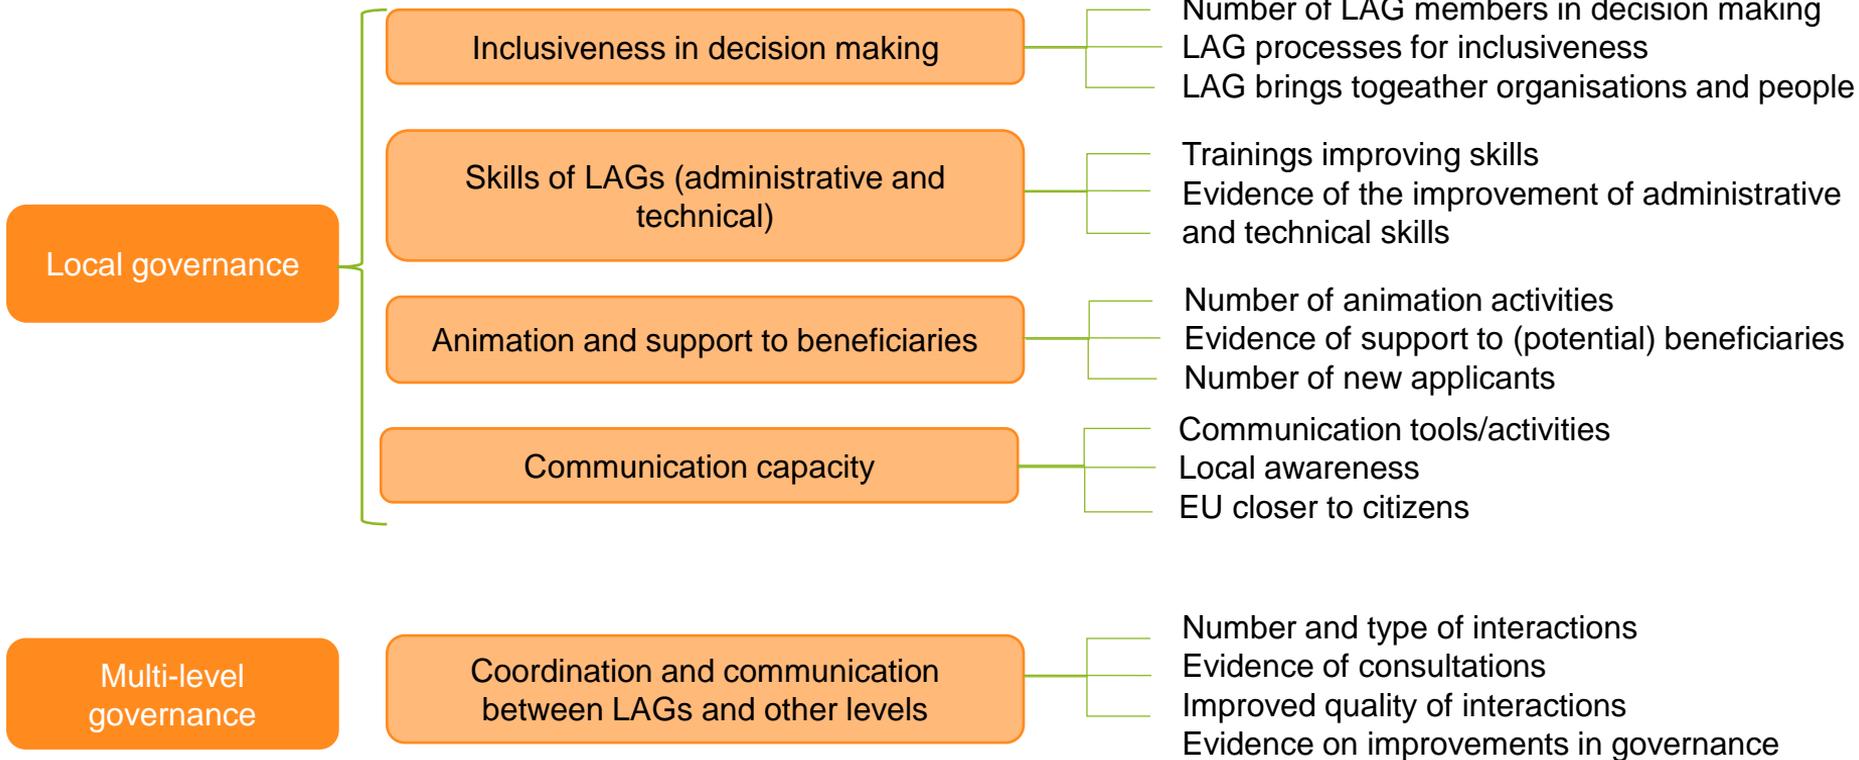

Example from Italy – Measuring the network element of social capital

- › The Network Diversity Index → used as a proxy for structural social capital
- › Looks at the composition of the LAG membership
- › Captures the level of diversity of the type of organisations inside each LAG
- › A wider variety within the LAG's membership could provide access to useful resources which are not otherwise available to a homogenous group of organisations

Improved governance

Factors of success

Example from Austria – factors of success for improving local governance

- There are structured mechanisms and **more transparency** for joint opinion-forming in the local area
- There is a strategic basis that helps to **align the activities** of the different actors towards common goals
- The different levels of administrative bodies operating in the region have been **better coordinated**
- The involvement of **non-institutionalised groups** and individuals has been successful

Enhanced results and impacts

Projects that:

Increase leverage

Stimulation of investment /activities

New project promoters

Mobilisation of additional resources:

- Expenditure on other investments
- Voluntary work
- Generation of new (non-funded) projects

New project promoters
Encourage more people to apply

Tailored to needs of territory

Meet local needs and objectives by a variety of project promoters

Different types of promoters
Projects that contribute to local needs
Community benefits
Valorisation of unique territorial assets

Innovation

Innovative elements at local level

No, % expenditure, types

Sustainability

LEADER projects produce sustainable results

No, % projects that contribute to econ., env., soc. sustainability
Knowledge of local conditions

Promote links between actors

Collaborative projects

No of projects working in synergy
% of projects that produce new cooperation

Indicators

Example from Lithuania – indicators for enhanced results

- Share of local projects that use local strengths or distinctive features of the LAG territory

such projects are seen as better meeting local needs and being more sustainable
- No. of people experiencing social exclusion participating in local projects

innovative, inclusive projects
- No. and share of local projects with innovations

implementation of local projects with innovations that are new in LAG territory or for the project promoter

Have your say

- › What is your current experience in the evaluation of the LEADER added value?
- › How can the EU / MS CAP **Networks support** Member States / LAGs in the evaluation of the LEADER added value?

We are keen to receive your feedback ...
